Assumptions/drivers

- Average deposit beta in Germany 2024: 37%, 2025: 39%, 2026: 42%, 2027: 43%
- Moderate increase in deposit volumes in PSBC Germany assumed (3% p.a.) leading to NII increase of €0.8bn
- In Corporate Clients -€0.1bn lower NII – higher NII from increased loan volumes at largely unchanged margins more than offset by lower contribution from deposits
- In Others and Consolidation -€0.2bn decrease expected (effect largely offset in NFV)
- NII of mBank is expected to decrease -€200m in 2024 (more than compensated by positive NFV development)

Active cost management

- Cost management compensating annual inflation of 2% – 2.5%
- Cost target to be adjusted depending on CIR trajectory
- Increase of cost efficiency to enable investments in client solutions and growth:
  - Complexity reduction with group wide initiative “Simply Easier” to streamline processes but also simplify products
  - IT modernisation and decommissioning of legacy systems
- Stable cost base expected for 2024 – lower costs from implementation of strategy 2024 offset by increase at mBank
- mBank’s costs reflect high inflation environment in Poland, increase of employment and upward path of amortisation as a result of already implemented projects and planned further investments
Consistent investment volume every year

Key drivers

- Deposits volume growth & modelled deposits
- Growth in securities volume (up to €50bn net new money by 2027) driven by strategic initiatives
- Declining loan volume due to the interest rate environment partly offset by optimized loan services
- New customers acquisition with value-added services and new technologies
- Increased efficiency from digitalisation
CC – stable revenues thanks to strong client relationships

Key drivers

- Reduced contributions from deposits due to lower rates and higher beta to be compensated by profitable growth in other product areas
- Increased lending volumes in Mittelstandsbank and growth in ESG related financing across all client groups
- Expansion of hedging offer and Trading platform as well as the offer of digitized FX and interest rate products
- Enhance our TF platform to ensure State-of-the-Art product offering
- Additional regulatory requirements will increase our capital base with negative impact on RoCET

**Capital return 2022-24**
Capital return 2022-2024 based on increasing pay-out ratios leading to a capital return of ~€3bn\(^1\)

- 2022: 30% (€0.4bn)
- 2023: 50% (~€0.9bn)\(^2\)
- 2024: 70% + X%

2024 return consists of share buy-back\(^3\) applied for after H1 2024 results and dividend approved at AGM in 2025

**Capital return 2025-27**
2025-2027 capital return with a pay-out ratio well above 50% but not more than the net result\(^1\); pay-out is depending on economic development and business opportunities

- Return consists of share buy-back\(^3\) and dividend approved at AGM of following year
- Commerzbank aims for a steady development of the dividend with increasing results. Share buy-backs will be applied for remaining capital to be returned within the pay-out ratio

**CET1 ratio**
Reaching and maintaining prudent CET1 ratio of 13.5%

- CET1 ratio of at least 250bps above MDA after distribution prerequisite for dividend payment
- Additional prerequisite for a share buy-back is a CET1 ratio of at least 13.5% after distribution\(^3\)

---

1) Pay-out ratio based on net result after potential (fully discretionary) AT1 coupon payments
2) Subject to final net result 2023
3) Subject to approval of ECB and German Finance Agency
Key financial highlights of the strategic plan

- Steadily increasing net RoTE reaching 9.5% in 2025 and 11.5% in 2027

- NII with tailwind from modelled deposits and further upside from potentially lower beta

- NCI with CAGR of 4% based on well defined initiatives

- CIR steadily improving towards 55% in 2027 – active cost management remains essential

- Moderate RWA increase with CAGR of 3% including largely mitigated Basle impact of €6bn

By their very nature, forward-looking statements involve risks and uncertainties. A number of important factors could therefore cause actual results to differ materially from those contained in any forward-looking statement. Such factors include, among others, the conditions in the financial markets in Germany, in Europe, in the United States and elsewhere from which Commerzbank derives a substantial portion of its revenues and in which it hold a substantial portion of its assets, the development of asset prices and market volatility, potential defaults of borrowers or trading counterparties, the implementation of its strategic initiatives and the reliability of its risk management policies.

In addition, this presentation contains financial and other information which has been derived from publicly available information disclosed by persons other than Commerzbank (“external data”). In particular, external data has been derived from industry and customer-related data and other calculations taken or derived from industry reports published by third parties, market research reports and commercial publications. Commercial publications generally state that the information they contain has originated from sources assumed to be reliable, but that the accuracy and completeness of such information is not guaranteed and that the calculations contained therein are based on a series of assumptions. The external data has not been independently verified by Commerzbank. Therefore, Commerzbank cannot assume any responsibility for the accuracy of the external data taken or derived from public sources.
