

# Annex 2

## Disclosure of information on the indicators of global systemic importance pursuant to Article 441 CRR

To identify institutions that might have global systemic importance, the Basel Committee on Banking Supervision (BCBS) collects indicators of size, cross-border activity, interconnectedness, substitutability and complexity once a year from potentially global systemi-

cally important banks. According to last year's survey, Commerzbank Group does not belong to the group classified as global systemically important banks (G-SIBs).

Commerzbank was requested by Deutsche Bundesbank in a letter dated 31 January 2022 to participate in this year's survey as a potentially systemically important bank. The detailed information on the indicators of systemic importance pursuant to Article 441 CRR can be found in the table below.
